Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: Group I, Claims 9-12 and 17-18; Group II, Claims 13-16.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Mr. Enrique Estevez on May 7, 2005 a provisional election was made without traverse to prosecute the invention of group I, claims 9-12 and 17-18. Affirmation of this election must be made by applicant in replying to this Office action. Claims 13-16 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-10 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Williams.

Williams discloses in figures 1-6 a mouthpiece comprising a body (fig. 6), of thermoplastic material (col. 3, lines 5-11), having the shape of a person's dental arch, including a posterior end (fig. 5), having two spaced apart members (fig. 5), an anterior end (col. 3, lines 6-7), having an air opening 14, a substantially rigid, protective mold (the remaining portion of the body, (posterior components bilaterally, col. 6, lines 20-21 and col 3, lines 17-21) and the mouthpiece body and the mold are a single non-separable piece.

Claim Rejections - 35 USC § 103

Art Unit: 3764

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-12 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Williams in view of Shapiro, along with Sue.

Williams discloses in figures 1-6 a mouthpiece, substantially as claimed. However, Williams doesn't disclose a removable plug inserted into the airway. Shapiro teaches in figures 1-4 a mouthpiece 1 having an anterior air way 25 and a plug 38 removably inserted into the air way. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the plug as taught by Shapiro could be inserted into the air way disclosed by Williams in order to use the plug to ensure integrity of the air way during the fitting process. Shapiro, also teaches the lower surface and the upper surface spaced apart therefrom at an angle which increases from the posterior end to the anterior end of the body (fig. 2). Williams discloses the imprints being on the inside of the body. It is a matter of duplication to having the imprints on an outside wall as taught by Sue.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

Art Unit: 3764

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 9-12 and 17-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 and 7-8 of U.S. Patent No. 6,619,290. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims recited in the present invention are broader, similar in scope and subject matter to the claims recited in U. S. Patent No. 6,619,290.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Meade, Parker, Tyler and Orrico, each discloses a mouthpiece.
